

En français!

En français!

French Reading Writing Spelling Math

Whether they have limited French exposure, or whether they are fluent French speakers who need to review fundamental concepts—or somewhere in between En français! can help students develop and hone in on their French Language Skills.

ESL Program (Ages 5-18)

As a non-native English speaker, you know that strong English skills can open doors and reduce the struggles that you encounter in your everyday life. Our English Language Development program is designed to help students of all levels of English proficiency develop a better understanding of the English Language. Using our unique phonetic approach to reading, students build a strong foundation of reading and reading comprehension skills, which leads to increased literacy and improved English fluency.

SAT Plus® and ACT Plus™

Essay Prep Math Test-Taking Time Management

Beyond Cramming

It takes more than simple cramming or an off-the-shelf workbook to get the best marks on the SAT. Oxford Learning's SAT PLUS® and ACT PLUS® students benefit from our integrated and comprehensive approach to the SAT/ACT.

About Oxford Learning

Since 1984, Oxford Learning has gone beyond tutoring and helped hundreds of thousands of students to reach their learning potential, not just for one grade or one year, but for a lifetime. Using the science of Cognitive Development, our unique programs teach children how to learn more easily, effectively, efficiently, and permanently, so that the cycle of hiring tutors year after year can finally end. Just a few hours a week can make a world of difference in developing the right skills and habits to succeed, no matter what the challenge, subject, or grade level.

What is the Dynamic Diagnostic Assessment™?

When students fail to reach their potential, there's always a reason. Because the reasons are not always obvious, we have developed the most dynamic assessment tools in the field. Oxford Learning is the undisputed innovator in the field of diagnostic assessment and program development.

We measure a whole range of indicators to precisely pinpoint how your child learns and what barriers your child must overcome to do better in school.

Armed with this information, we create a program targeted to achieve results for your child.

Little Readers® Ages 3 to 6

Reading Phonics Math Listening Fine Motor Fun

Give Your Child a Head Start

The years between the ages of three and six are a period of significant growth in a child's life.

For example, a child's knowledge of the alphabet in Kindergarten is one of the most significant predictors of what a child's grade 10 reading ability will be. That's why it's the perfect time to teach your little one to read.

Children's minds are alive with curiosity. They have an energetic fire to know and understand their world. Little Readers® helps to keep those flames burning.

A Strong Foundation

The results of over 20 years of dedicated research into how young minds learn and grow allow us to introduce new learning activities at the exact time when children are the most receptive to them. Little Readers® lays the foundation for a life-long love of learning.

Days per Week	Monthly Rate (10 months)
2	\$325.00
3	\$425.00
4	\$525.00
5	\$595.00

Beyond Tutoring® Grades 1 to 8

Reading Writing Math Homework French

A Chance to Soar!

Beyond Tutoring™

When the doors to learning are unlocked, a child has unlimited opportunities for the future. That's why we offer individual programs that address each child's school needs, learning style, and self-esteem.

Whether your child is struggling in school or is getting straight As, we have a program that fits.

Starting with an in-depth Dynamic Diagnostic Assessment™, we pinpoint your child's learning strengths and weaknesses. Then, a unique, individualized program provides help where it is needed most.

The Result?

Real and lasting improvements in grades, confidence, and self-esteem.
