

Reading is to Learning What Breathing is to Living

Oxford Learning Academy was created in response to a demand for an exceptional Primary Education program that builds a solid academic foundation and develops lifelong learners. This unique, individualized program utilizes curriculum from Oxford Learning's signature programs and is enriched with French, music, arts, physical education, and environmental education. Small class sizes allow our teachers to foster leadership, creativity, and teamwork in an inquiry-based environment. Through our personalized approach and theme-based curriculum, students focus on building reading, writing, math, and fine motor skills.

The goal of our program is to equip our students with active minds, self-confidence, and the skills they need for lifelong success.

Oxford Learning Academy's individualized programs are tailored to the academic needs of each student, whether your child is still developing basic phonics skills or is in need of enriched academic activities. Small groups allow teachers to create a fun, positive, personalized learning environment in which students can make academic gains at their own pace.

We look forward to meeting your little one and helping him or her discover a love for learning!

Quick Facts:

- From the age of 3 onward, the parts of the brain that acquire language grow at an incredible rate.
- Studies show that early reading skills are the single biggest predictor of future academic success.
- Building a strong foundation will help your child succeed throughout their school years.

Oxford Learning Academy

Pre-school to Grade 3

Reading Excellence and Academic Development

Prepare your child for success with our academic program that combines learning, play, and hands-on exploration. Our goal is to grow strong learners through an engaging and personalized primary education program from pre-school to Grade 3.

"The students are encouraged to go at their own pace and the sky is the limit"
-Olga, mother of Vera (age 6)

Assessment:

Using a combination of a cognitive and academic assessment, we set specific targets for every student and evaluate progress at regular intervals. Consistent and appropriate evaluation helps teachers streamline the students' programs so that they are challenged appropriately.

Small class size:

Every student is guaranteed one-on-one time with our certified teachers each day. Each student's personal interests become the driving force of classroom themes and units. Students develop critical problem-solving and positive social skills.

Individualized Programming:

Each student's program is unique. Students progress at their own pace while they develop essential learning strategies. Our students are consistently challenged and always feel confident.

Phonics-based reading programs:

Studies show that children who learn to read early perform better throughout their school years. Our phonics-based program has proven results in reading, writing and math.

"One of the main benefits I have experienced, as a result of the small class size, is the teacher's ability to tailor lessons to my children's interests. My son loves comic books so during the Greek Mythology week, the class made a comic book using themselves and the Greek gods as the main characters."
- Karen, mother of Milan and Aahna (ages 5 and 4)

Additional Highlights:

- French language enrichment
- 60 minutes of daily physical activity
- Classroom enrichment including guest speakers, artists, and workshops
- Full art and music program
- Environmental education
- Field trips and community connections
- Weekly trips to the Annette St. Library
- Fewer PA days, breaks, and closures.
- Regular progress reports and family open houses.
